

# T3 POLY TOOL

**MULTI PURPOSE TOOL**  
For opening manhole covers

Cod. K0272

*T3 POLY TOOL is a clever multi purpose tool designed to make the typical operations needed before to open the covers of manholes, the three extremities have different configurations that allows to drill and scrap, to grab, to open the latches that lock some covers and allow to lift and remove manhole covers. Tool is delivered in a robust "cordura" pouch, studied to ease the operations. T3 POLY TOOL is an effective and sometimes irreplaceable tool in operation of manoeuvres of manhole covers.*

## TECHNICAL CHARACTERISTICS

WEIGHT

Kg 0,5

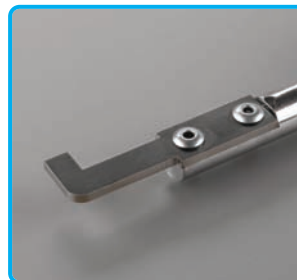

DIMENSION

cm 27 x 27 x 27

- 1** Use the extremity with drill bit to energetically and deeply clean the slots of the covers that are always closed by hard incrustations that do not allow the insertion of the lifting keys, the bit can be changed and or re sharpened with a grinder.

- 2** Use the "L" extremity as rotation cleaner to erase in the internal aperture of the slots to liberate completely the internal rotation space and allow the insertion of the key, can also be sued as lever to unlock the latch that blocks some covers before opening.

- 3** Use the "T" extremity as insertion hooking key in the slots, grabbing then tool as handle to lift by hands or using a chocking belt to lift standing up.
