MAGNETIC LIFTERS NAILTYPE

Practical and versatile tool designed to hook, lift and move all types of manhole covers, drains and grids. Maintenance for water, gas, sewers, telecommunications.

The particular angle of the lever allows an ideal ergonomics for standing operators.

Robust and durable tool, fully galvanized.

The "Nail" is laser cut steel, it is shaped to hook in the best way the manhole covers slot with greater strength and durability during lifting operations.

The lower end is made of solid steel that can be used to beat the cover when it's blocked.

The hard plastic handles ensure perfect grip.

TECHNICAL CHARACTERISTICS

Code	K0359	
Weight	Kg	2,5
Length	cm	120

The "Nail" can also be used for cleaning the manhole frame from rusting and as a strong scourer inside the frame.
